SAMPLE LOCATION XML DOCUMENT

```

- <LocationInformation>
  - <MobileDevice TrackID="1234567890" RequestTime="20000626115751+-0800" ErrorCode="0">
    - <Geographic Velocity="0" PositionTime="20000626115751+-0800">
      - <GeodeticDatum>
        - <WGS-84>
          <LatLong PositionFormat="IDM80" Latitude="N374820" Longitude="W1222738" />
        </WGS-84>
      </GeodeticDatum>
      <HeightDatum HeightFormat="meters" HeightValue="500" />
      <Region RadiusFormat="meters" InnerRadius="0" OuterRadius="100" StartAngle="0" StopAngle="360" LevelOfConfidence="100" />
    </Geographic>
    <TowerID PositionTime="20000626115751+-0800" Name="95110" Type="ZIP" />
  </MobileDevice>
</LocationInformation>

```

The handwritten annotations consist of five numbers (811, 832, 833, 871, 872) connected by lines to various parts of the XML code:

- Annotation 811 points to the opening tag of the LocationInformation element.
- Annotation 832 points to the opening tag of the LatLong element.
- Annotation 833 points to the HeightValue attribute of the HeightDatum element.
- Annotation 871 points to the Name attribute of the TowerID element.
- Annotation 872 points to the Type attribute of the TowerID element.
